

Layne Fester

Milwaukee, WI | ldfester@uwm.edu | laynefester.me | linkedin.com/in/layne-fester

Computer Science student and CompTIA Security+ holder seeking a Summer 2027 IT internship. Support a five-person business across Microsoft 365, networking, computers, printers, web hosting; practice with Windows/Linux administration in a Proxmox lab.

EDUCATION

University of Wisconsin-Milwaukee — B.S. Computer Science

Expected May 2029

GPA: 3.6/4.0

CERTIFICATIONS

CompTIA Security+ (SY0-701), 2026 | **Microsoft Excel Expert**, 2024 | **Microsoft Word Expert**, 2024

EXPERIENCE

IT Administrator — Ehlert Welding Co., Inc., Byron, WI

Dec 2025 – Present

Full-time in summer and breaks; remote support during school

- Administer Microsoft 365, Exchange Online, accounts, and network services for a five-person welding business.
- Troubleshoot computers, printers, and network connectivity; perform hardware repairs and maintenance and support manual file backups to a locally connected NAS.
- Migrated company email from a legacy provider to Microsoft 365 following a service outage; configured SPF, DKIM, DMARC, and multi-factor authentication.
- Manage domain registration, DNS, hosting, and HTTPS; rebuilt and deployed the company website and moved DNS management to Cloudflare.

PROJECTS

Active Directory and Security Logging Homelab — Personal Project

- Built a five-VM Proxmox lab with Windows Server Active Directory and DNS, a domain-joined Windows 11 workstation, Ubuntu services, Wazuh, and a Kali Linux practice VM.
- Configured organizational units, users and groups, and a workstation Group Policy audit baseline; enabled Sysmon, process-creation auditing, and PowerShell logging.
- Enrolled Windows and Linux agents in Wazuh and verified collection of Windows security, Sysmon, and PowerShell events; resolved DNS and Linux storage issues during setup.

TECHNICAL SKILLS

Systems & Identity: Windows, Ubuntu, Active Directory, Group Policy

Cloud & Collaboration: Microsoft 365, Exchange Online, Cloudflare

Security & Monitoring: Wazuh, Sysmon, PowerShell/process-creation logging

Infrastructure: Proxmox, networking and DNS, NAS backups, computer and printer support
